

ABSTRACT OF THE DISCLOSURE

This assembly (1) for a motor vehicle includes outer trim (4) presenting a line (7) of weakness which defines a flap (9) covering an air-bag, and a peripheral region (10) surrounding the flap, a first reinforcing member (12) for reinforcing the peripheral region (10), a second reinforcing member (13) for reinforcing the flap, and a hinge (14) connecting the first and second reinforcing members. The second reinforcing member (13) and the hinge (14) are made by molding a plastics material, and the hinge (14) is overmolded onto the first reinforcing member (12).
